Safety Precautions

- Read all instructions in this manual.
- Use the power adapter provided.
- Position cables safely.
- Keep the unit away from water and moisture.
- Keep the unit away from excessive heat.
- Do not drop.
- Do not open.
- Have all service performed by a qualified technician.

SETTING the TRANSMITTER CHANNEL

Using the Rotary Tuning Switches, set the left and right switches to correspond to the channel number you need to transmit on. The MWT-S8 has 13 possible transmitting channels of MYE Frquencies and 12 Channels on the Cardio Theater / Enercise xTV Frequencies.

EXAMPLE: To set your transmitter to channel “1”, carefully turn the left Rotary Tuning Switch to the number “0” and turn the right switch to the number “1”. Note: It is important to confirm the switch “LOCKS” on the selected number.

Connecting the MWT-S8 to an Audio Source

Audio Output

TV's, VCR's CD players, DVD players, Satellite and Radio Tuners can be used as audio sources for the MWT-S8. All will require stereo RCA style audio output jacks in order to use the supplied MYE stereo audio cable. Audio sources that use different output jacks will require a different audio cable.

To use a **TELEVISION** as an audio source for the MWT-S8 transmitter, the TV must have "Audio Output Jacks." Televisions with this capability may come with either "Fixed" or "Variable" audio output. Please consult your television Owner's Manual as to their operation.

Connect the Transmitter

1. Using the stereo audio cable supplied, connect one end into the left and right audio OUTPUT jacks of the audio source.

2. Plug the other end of the audio cable into the left and right audio INPUT jacks on the MWT-S8 transmitter.

Connecting the MWT-S8 to an Audio Source - cont

Note: The MWT-S8 Transmitter features an Automatic Level Control (ALC) to provide distortion free sound without concern for loud commercials or audio track spikes.

3. Insert the DC power plug into the DC power jack on the MWT-S8 and plug the AC power adapter into an AC outlet. The power light on the MWT-S8 will turn “GREEN”. The unit is now ON.

4. Turn on your audio source and adjust audio level. When the audio signal is being received by the MWT-S8 transmitter at an acceptable level the AUDIO INDICATOR LIGHT will turn GREEN.

5. When using TV’s with audio output, turn the speakers down or off.
   (Consult your TV’s Owner’s Manual for Fixed and Variable Audio Output operation.)

6. When the audio drops BELOW an acceptable level for the Automatic Level Control (ALC) the audio light will turn OFF. A flashing GREEN audio light does not require adjustment of the audio source for normal operation. When an acceptable audio level returns to the unit, the light will turn green again. A flashing GREEN light may happen during TV programs or songs when audio is low or not present.

7. When NO audio level is present for longer than 30 seconds the audio indicator light will turn OFF. (If no audio light is present, check the audio level in the receiving devise then confirm all your audio cable connections and/or check the audio source equipment.)

8. When audio rises ABOVE the acceptable level for the Automatic Level Control (ALC) the audio light will turn RED. If the audio light is RED for longer than 30 seconds, check and reduce the settings of the source audio equipment.

9. The audio light may occasionally flash RED during some programming when audio levels momentarily rise above acceptable levels. A flashing RED audio light does not need adjustment of the audio for normal operation. When a continuous acceptable audio level is returned to the unit, the light will turn green again. This may happen during some TV programs or songs when audio levels spike naturally.

10. Use a MYE Entertainment 800MHz controller to verify audio transmission is complete.

Stand-by Mode and Alert

11. In keeping with R&TTE Directive 1999/5/EC if there is an interruption of the input audio for longer than 4 minutes this transmitter will automatically switch to “low Power Stand-by” mode. Indication the transmitter has entered Stand-by mode is a consistent flashing green audio light.

    Transmitting can be restored by reintroducing a constant audio signal into the transmitter for longer than 5 seconds.

MWT-S8 Mounting Bracket

The MWT-S8 comes with a Mounting Bracket that allows for easy wall, ceiling or under-shelf mounting of the transmitter. Four holes in the bracket give access for screws or nylon cable ties. The mounting bracket SNAPS into either the TOP or BOTTOM of the MWT-S8 giving the transmitter a high level of adaptability and solid positioning in nearly all mounting scenarios.
